IRVINE SENSORS TO WEB CAST COMPANY PRESENTATION AT THE 2007 ANNUAL STOCKHOLDERS MEETING

Presentation is scheduled for Wednesday, June 27, 2007 at 1:30 PM (Pacific Time)

COSTA MESA, California, June 11, 2007 -- Irvine Sensors Corporation (NASDAQ: IRSN, Boston Stock Exchange: IRSN) announced today that it will web cast the management presentation of the Company's status and plans given at Irvine Sensors Annual Stockholder's Meeting.

The Irvine Sensors web cast presentation will follow the business portion of the meeting and will start at approximately 1:30 PM, (Pacific Time) on Wednesday, June 27, 2007.

The conference call will be broadcast live over the Internet and can be accessed by all interested parties via a link on Irvine Sensors' homepage at www.irvine-sensors.com. Please allow at least fifteen minutes prior to the start of the call to register, download, and install any necessary audio software. For those unable to monitor the live broadcast, a replay will be available shortly after the conclusion of the call, and remain archived on the Irvine Sensors site through July 20, 2007.

Analysts and Investors who would like to participate in the Q&A Session following the web cast, may obtain the dial-in number from Investor Relations via email at investorrelations@irvine-sensors.com before noon, Wednesday, June 27, 2007. If you are not able to participate in the Q&A Session, you may e-mail your questions to Investor Relations at investorrelations@irvine-sensors.com. Questions will be addressed as time permits.

Irvine Sensors Corporation www.irvine-sensors.com is a vision systems company engaged in the development and sale of miniaturized infrared and electro-optical cameras, image processors and stacked chip assemblies, the manufacture and sale of optical systems and equipment from military applications through its Optex subsidiary and research and development related to high density electronics, miniaturized sensors, optical interconnection technology, high speed network security, image processing and low-power analog and mixed-signal integrated circuits for diverse systems applications.
