## **WEB CAST OF IRVINE SENSORS COMPANY PRESENTATION AT 2008 ANNUAL STOCKHOLDERS MEETING TO START AT APPROXIMATELY 1:30 PM PACIFIC TIME, JULY 30**

**COSTA MESA, California**, July 28, 2008 –Irvine Sensors Corporation (NASDAQ: IRSN) issued a reminder today that the web cast of the Company’s management presentation at its Annual Stockholders Meeting on Wednesday, July 30, 2008 is expected to begin at approximately 1:30 PM Pacific Time on that date, as has been previously posted on its web site. The management presentation conference call will follow the business portion of the Annual Meeting and will be broadcast live over the Internet. The web cast call can be accessed by all interested parties via a link on Irvine Sensors’ homepage at [www.irvine-sensors.com](http://www.irvine-sensors.com). Listeners to the web cast should allow at least fifteen minutes prior to the start of the call to register, download, and install any necessary audio software. For those unable to monitor the live broadcast, a replay will be available shortly after the conclusion of the call, and remain archived on the Irvine Sensors web site through August 1, 2008.

Stockholders who are unable to attend the Annual Meeting may e-mail questions to Investor Relations at [investorrelations@irvine-sensors.com](mailto:investorrelations@irvine-sensors.com) for consideration in the Q&A session that will follow the management presentation. Questions will be addressed as time permits.

Irvine Sensors Corporation ([www.irvine-sensors.com](http://www.irvine-sensors.com)), headquartered in Costa Mesa, California, is a vision systems company engaged in the development and sale of miniaturized infrared and electro-optical cameras, image processors and stacked chip assemblies, the manufacture and sale of optical systems and equipment for military applications through its Optex subsidiary and research and development related to high density electronics, miniaturized sensors, optical interconnection technology, high speed network security, image processing and low-power analog and mixed-signal integrated circuits for diverse systems applications.
