**FOR IMMEDIATE RELEASE**

### **IRVINE SENSORS SETS 2nd QUARTER CONFERENCE CALL Webcast Scheduled for Monday, May 17, 2010 at 1:15 PM (Pacific)**

COSTA MESA, CALIFORNIA -- May 6, 2010-- Irvine Sensors Corporation (NASDAQ: IRSN) today announced that it will host a conference call to discuss results of its second quarter and first half of fiscal 2010, the 13 and 26 weeks ended March 28, 2010 on Monday, May 17, 2010 at 1:15 PM Pacific Time. Analysts and Investors who would like to participate in the Q&A Session following the web cast, please request the dial-in number from Investor Relations at [investorrelations@irvine-sensors.com](mailto:investorrelations@irvine-sensors.com) **before noon, Monday, May 17, 2010**. If you are not able to participate in the Q&A Session, you may e-mail your questions to Investor Relations at [investorrelations@irvine-sensors.com](mailto:investorrelations@irvine-sensors.com). Questions will be addressed as time permits.

Irvine Sensors' CEO John C. Carson and CFO John Stuart will host the Company's call to discuss those results. The conference call will be broadcast live over the Internet and can be accessed by all interested parties via a link on Irvine Sensors' homepage at [www.irvine-sensors.com](http://www.irvine-sensors.com). To listen to the live call, please go to the Irvine Sensors website at least fifteen minutes prior to the start of the call to register, download, and install any necessary audio software. For those unable to monitor the live broadcast, a replay will be available shortly after the conclusion of the call, and remain archived on the Irvine Sensors site through May 31, 2010.

Irvine Sensors Corporation [www.irvine-sensors.com](http://www.irvine-sensors.com) is a vision systems company engaged in the development and sale of miniaturized infrared and electro-optical cameras, image processors and stacked chip assemblies and sale of higher level systems incorporating such products. Irvine Sensors also conducts research and development related to high density electronics, miniaturized sensors, optical interconnection technology, high speed network security, image processing and low-power analog and mixed-signal integrated circuits for diverse systems applications.
